**Matt Mizenko** – General Manager, email: [matt@nomorobo.com](mailto:matt@nomorobo.com), mobile: 425-420-3773

# What is Nomorobo?

Nomorobo is a call protection app that blocks robocalls, phone scams, and telemarketers before they reach you. It's designed to give people peace of mind by filtering out unwanted calls, protecting privacy, and making sure only real, important calls get through. Used by millions, it's trusted for its effectiveness and simplicity — whether on mobile phones or landlines.

**The app has won awards from the FTC and is regularly featured in top tech publications. With Nomorobo, users stay in control of their phones — no interruptions, no stress.**

“We built Nomorobo to give people their phones back. Privacy shouldn't be a premium feature — it should be default.”

Aaron Foss, Founder of Nomorobo

# How does Nomorobo work?

When a call comes in, Nomorobo instantly checks the number against its constantly-updated database of known robocallers and scammers. If the number is flagged as spam, the call is blocked or marked as suspicious so you can ignore it. If it's a legitimate call, it rings like normal. Nomorobo also offers voicemail transcription, spam text alerts (on iPhone), a personal block list, and a full call history — all working quietly in the background to keep your phone safe.

# How to use Nomorobo app?

## Download the app

Go to the App Store and install Nomorobo Robocall Blocking on your iPhone.

## Enable call blocking

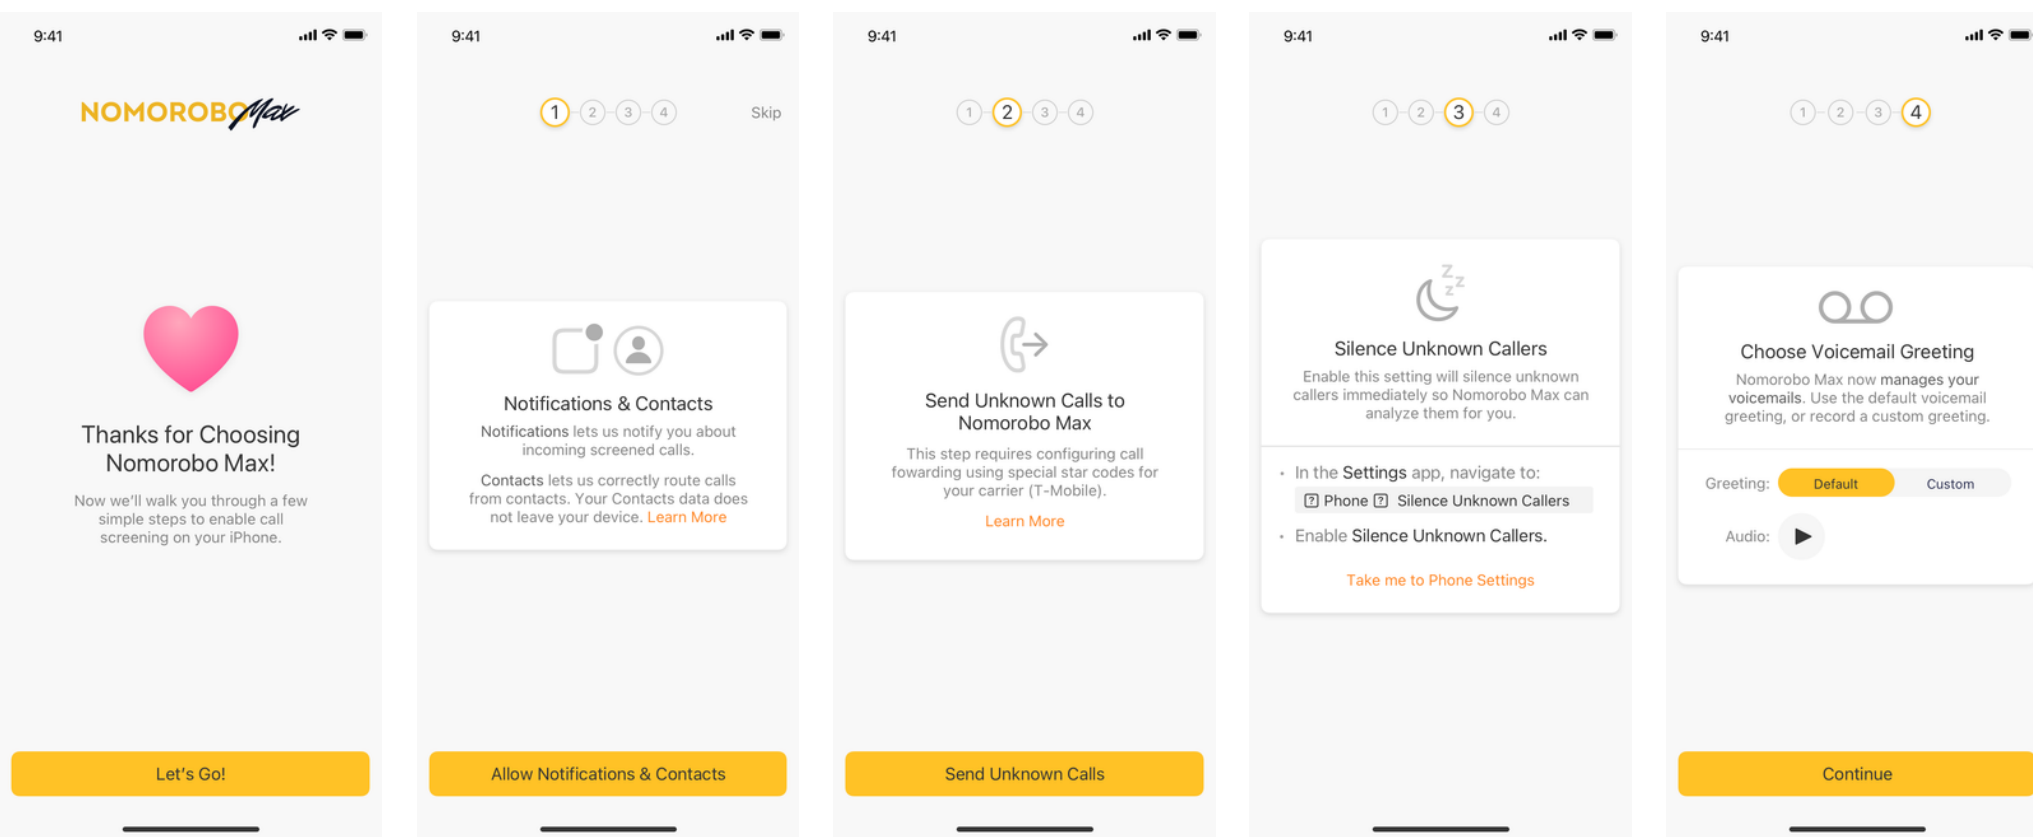

Follow the in-app instructions to turn on Call Blocking & Identification in your phone settings. This lets Nomorobo filter incoming calls in real time.

## Set up voicemail & notifications

Customize how you want blocked calls handled — send to voicemail, silence them, or get alerts when something is flagged.

## Enjoy the silence

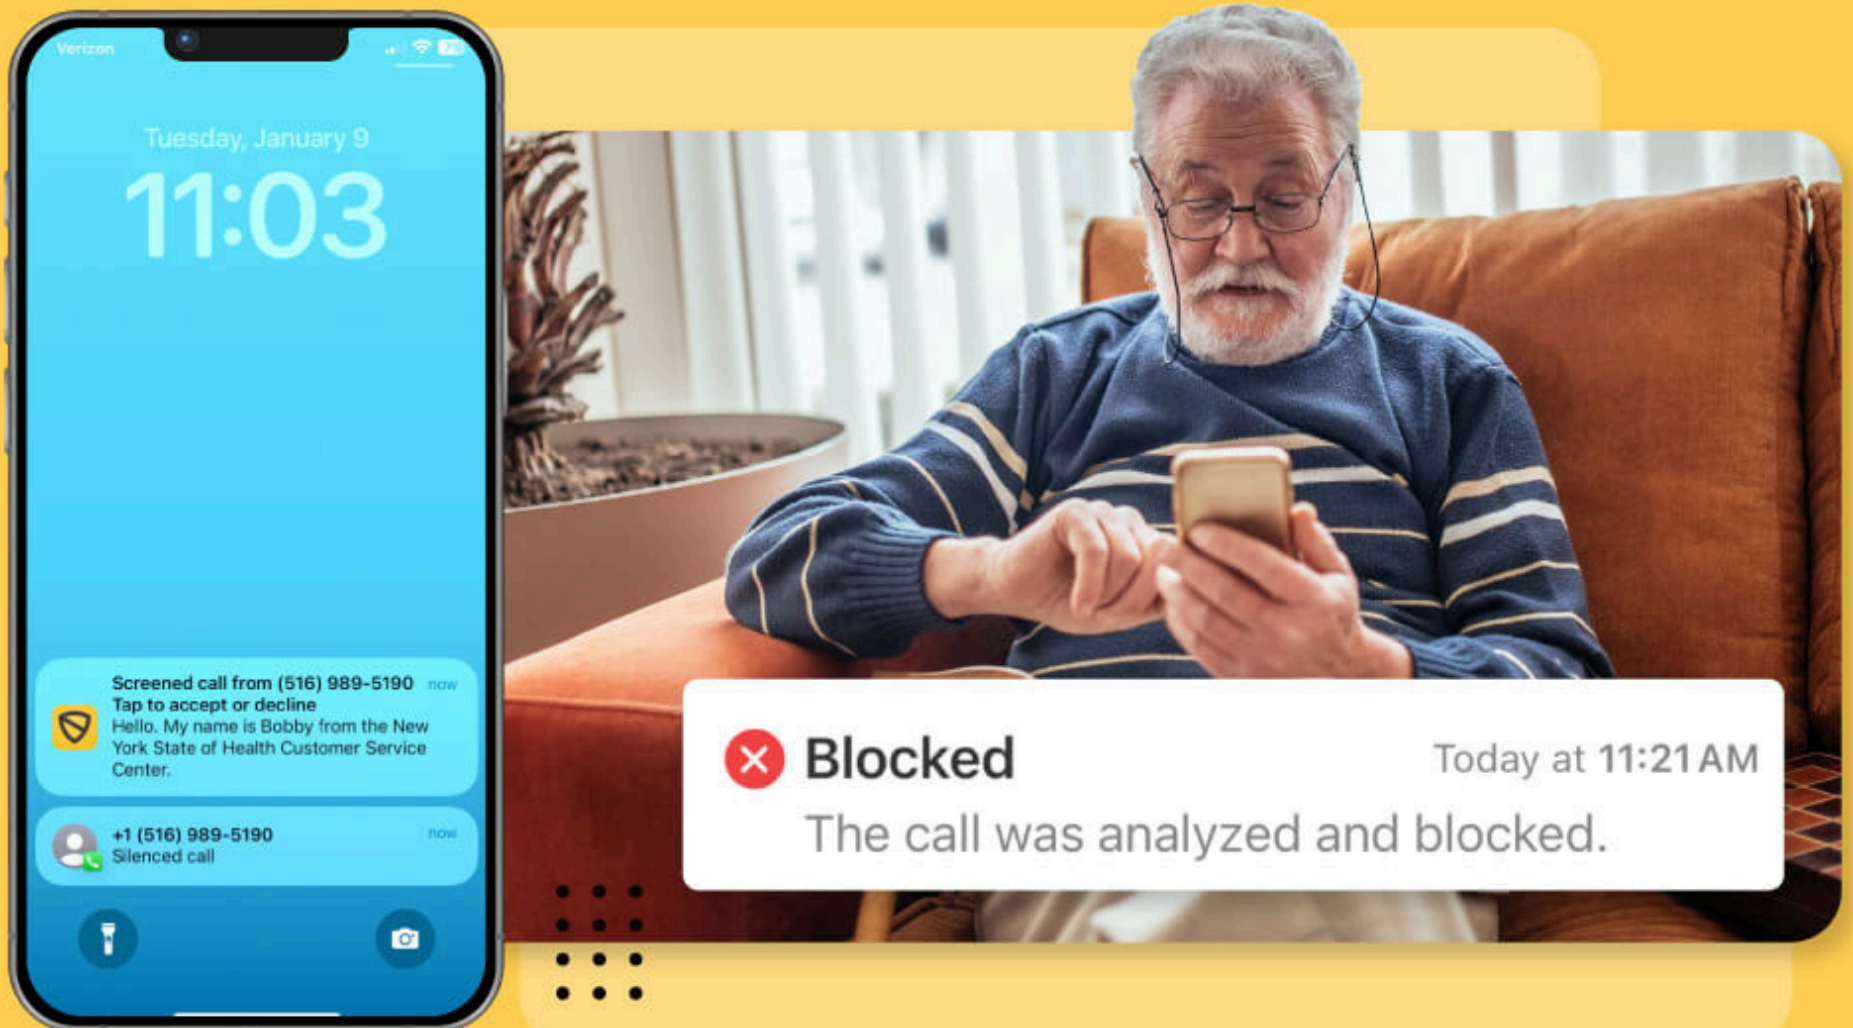

That's it! Robocalls and spam are blocked automatically. You can check your Call Log, add numbers to your Personal Block List, or adjust settings anytime.

## Use it for...

- blocking spam calls to elderly parents' home lines
- shielding kids from scam texts and phishing links
- stopping neighbor-spoofing calls while keeping real ones
- screening unknown numbers with voicemail transcription

## Pricing and Availability

Available now on the App Store, Google Play, and for most VoIP home phone systems in the U.S.

**Nomorobo VoIP - Free**

**Nomorobo - starts at \$2.99/month**

**Nomorobo Max - starts at \$11.99/month**

**Nomorobo Family - starts at \$14.99/month**

# What makes it different?

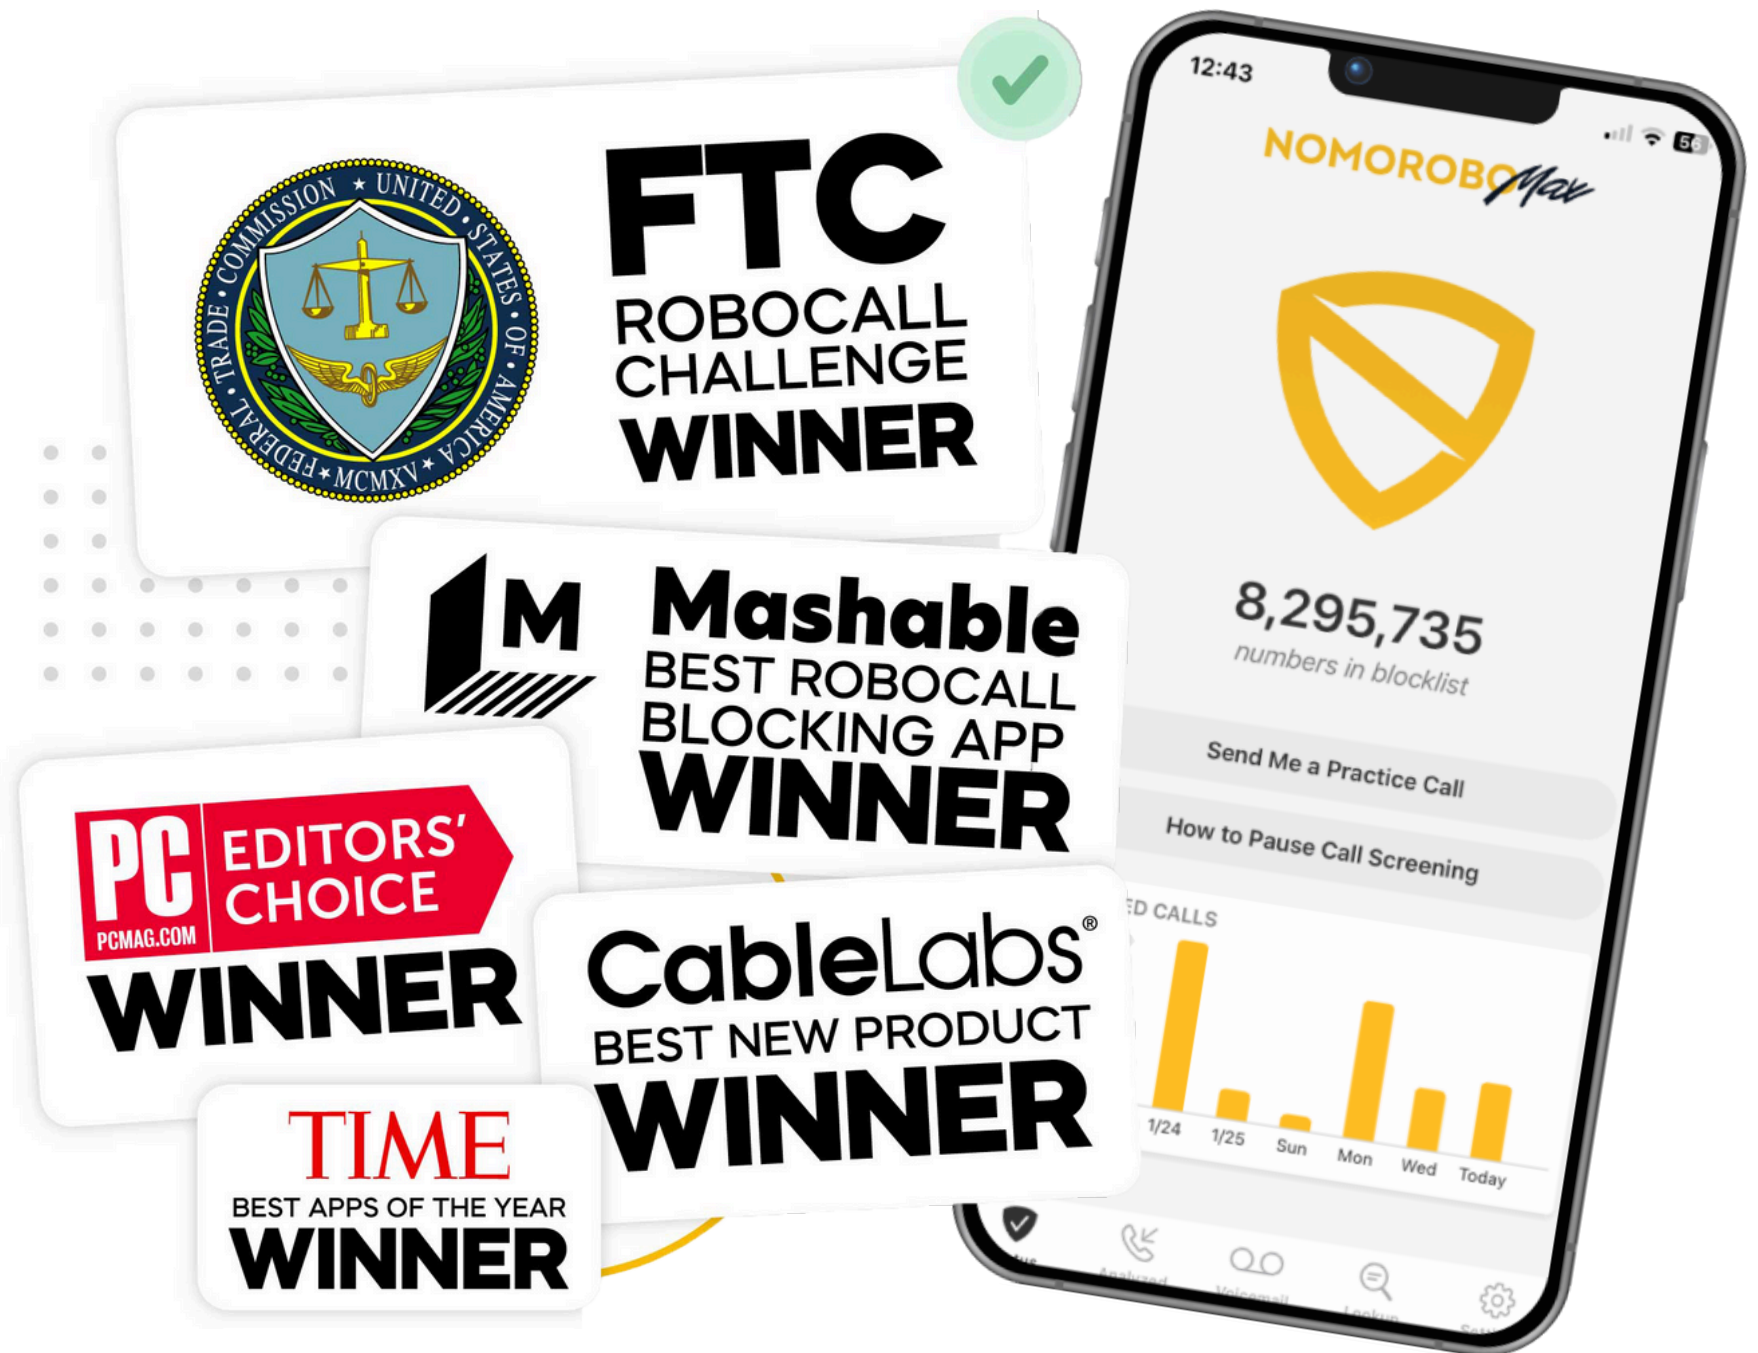

Unlike other call blockers, Nomorobo doesn't rely on static spam lists. It uses live traps to detect spammer behavior before they even reach your number, and AI-based screening to challenge unknown callers on the spot. It's like having your own assistant who screens every call and flags every fake message — instantly.

# Key Features

- over 3 billion robocalls blocked
- filters spam texts and phishing links
- live AI call screening and voicemail transcription
- works with VoIP, iOS, and Android

# Matt Mizenko

**Matt Mizenko** is the General Manager of Nomorobo, the nation's leading robocall-blocking app and a trusted provider of consumer protection and telecom intelligence. With over a decade of experience in the call protection space, Matt has held senior leadership roles at industry pioneers including Caller ID Reputation, Robokiller, and Hiya, driving innovation across both B2C and B2B products.

Matt's career spans product development, engineering, operations, strategy, business development, compliance, and government affairs, making him one of the most well-rounded voices in the fight against phone fraud. His work has helped launch and scale mobile solutions used by millions of consumers around the world, blending technical expertise with a deep commitment to digital safety.

## Certifications & Recognition
